

## Comprehensive Portfolio of Wireless Network Services

We specialize in complete end-to-end, enterprise-class Wi-Fi solutions and services for every business regardless of level of expertise and complexity, location, size and industry. We incorporate best practices for site surveys and design, as well as accommodate security guidelines for highly sensitive and regulated industries.

### WIRELESS SITE AUDITS

First, our site survey team is equipped with custom site survey kits that are fully self-powered and eliminate the need for customers to have a man-lift on hand. Our complete summary of the current wireless environment includes Visio diagrams and heatmaps confirming existing Access Point layout and proposed layout for optimal coverage.

### ARCHITECTURE, PRE-CONFIGURATION, LOGISTICS

Next, our certified engineers will work hand-in-hand with you to design an end-to-end solution that meets both your needs and budget – includes all major OEM solutions and all the equipment you need. We can stage and pre-configure the equipment and then we will ship to site for install.

### INSTALLATION SERVICES

Then we will label AP's with your naming conventions and perform any required ethernet cable adjustments. We can supply a full cabling design and installation along with the conduits and drops. Our team will perform AP, networking and cabling installation and provide full documentation of configurations, locations and labeling.

### FINAL OPTIMIZATION AND DOCUMENTATION

Last, we will validate the wireless install and tune APs for optimal performance and review new architecture for final coverage and interference. We will provide a final analysis report including environment health status and key findings with engineering notes. Trifecta can be available for annual performance surveys and any onsite or remote services needed.

Get **IT** Done!
