

## Plan. Coordinate. Execute.

In today's Professional IT environment, we rely on technology to deliver instant, seamless access to assets and information. Trifecta Network's PMO provides visibility, support, enhancement, and infrastructure-based solutions to keep your network running efficiently, day in and day out, with as little downtime as possible.

Regardless of the size of your project, Trifecta's Professional Services Team will provide a world-class PMO experience, leveraging our stable of IT professionals to keep your network ahead of the industry standard.

### Implementation

Infrastructure refresh, cabling, smart hands, cut/overs, and configurations.

### Wireless Surveys

Wireless network design, VoIP, consulting, deployment, and troubleshooting.

### Structured Cabling

Design and execute full multi-site upgrades, new builds, retrofits, copper and fiber installation.

### Staging & Configuration

Final assembly and testing, asset tagging, imaging, custom software, and product integration.

### Warehouse Services

Store your IT equipment and deploy your assets on-demand to locations around the globe.

### Site Audits/Assessments

Gain an objective and complete view of your network, data center, and infrastructure capabilities.

### Staff Augmentation

From help desk to engineering, a cost-effective and efficient way to improve your team with specialized staff.

### Rentals

Flexible, customizable contracts for on-demand services for any project or OEM.
