

**EXPECT THE BEST  
WITH 5-STAR  
CERTIFIED GEAR**

Let's be real for a minute: We know you've got a lot of options when it comes to IT vendors. We also believe you'll find nothing like the 5-Star Certification process at Trifecta Networks.

At this point, we're sure you've heard of us. In fact, you've probably heard from us a time or two. So, let's dive a little deeper into this 5-Star Certification we're always so hyped about. We think you'll see it's the best preowned program out there.

It starts with our quality-controlled supply chain. Basically, we've been around long enough to separate the contenders from the pretenders. We've built some solid relationships over the years and we only accept equipment from folks we trust. They're the real deal, so we know we're getting the best preowned equipment available right from the start.

But, just in case, we do a comprehensive physical audit and inspection. That means our team of certified engineers gets all up in the nooks and crannies to confirm authenticity and screen for signs of tampering or damage.

We follow that with the fine-tooth treatment – a board-level inspection – disassembling equipment as necessary to identify damage or unauthorized repair work. If our people uncover any funny business, the equipment gets tossed. Gone. (But safely recycled)

Next (we're on step four now) comes functionality testing. Our techs power up those bad boys and restore default settings, giving them new life. We've got some fancy in-house automation software and proprietary error-check scripts to go along with a bunch of other testing that confirms these machines are in tip-top shape.

Finally, the gear that makes it through our rigorous rites are finished and packaged to perfection. We clean them up with compressed air, mitigate any blemishes and get rid of any annoying stickers or adhesives that just look bad. We then store them in our state-of-the-art, ISO-certified warehouse where they're readily available to be purchased by you, our future happy customer.

So, as you can see, we take this stuff very seriously – serious enough to offer a lifetime warranty on all our equipment. But, not so serious that we get all uppity about it. We simply believe in the process and can't wait for you to experience the difference a little 5-Star action makes. Go ahead and give it a try!

### Take Control of Your Tech

You know how OEMs roll. A tiny part tweak here, a model number change there and boom, you're forced to get the latest and greatest just to keep up. Not with Trifecta Networks. Not only do we offer 5-Star Certified preowned IT equipment with Tri-Net third-party maintenance coverage, we let you replace your technology when you want to. That means you can push back on OEMs trying to upsell you every year. Get yourself a reliable Trifecta 5 star certified device backed by our maintenance and lifetime warranty, then just ... relax. It's your world, IT vendors are just living in it. So, go with a vendor you actually like. We keep things real because our products and company culture speak for themselves. We'll tell you how it is, spell out all your options and create a custom solution fit for you and your network.. We think you'll like what you hear because at Trifecta, you're in control.
