

Ensure seamless and efficient IT asset lifecycle management with Trifecta's warehousing and logistics solutions. Our **ISO-certified warehouse** and dedicated team provide secure storage, staging, configuration, and deployment, seamlessly extending your operations. Leverage our **scalable and customizable approach** to manage any project.

What Trifecta's warehouse services can do for you:

Customized Solutions

Your organization is unique. Trifecta **creates custom solutions** designed around your needs, no matter the size or complexity.

Reduce Cost

Free-up and declutter your space, **eliminate equipment losses**, and save money by **reusing previously deployed equipment**.

Save Time

Our facility, team, and technology handle time-consuming tasks like **reimaging your IT assets, shipping, and reporting**, freeing your staff to handle bigger priorities.

End-to-End Project Management

Rest easy knowing your assets are **expertly tracked and managed**. We offer full visibility and transparent communication, so you can focus on what matters most.

Services Offered

Warehousing:

- Inbound receiving, asset tagging and serialized reporting
- Pallet storage (short and long term)
- Inventory audit and management: receive, triage, test, clean, data wipe, sticker removal, (re)image, OS reset/updates
- Desktop and laptop imaging
- Rack builds
- Server, network and PDU configuration

Logistics:

- Staging and configuration leveraging our in-house engineering team to image, configure and build solutions
- Multi-site rollouts: inbound and outbound device management (QC, label management, prepare / pack, timely shipping)
- Kitting / master packs: branch office in a box (BOB), device management for employee on-and-off-boarding
- Hot swap / sparing
- ITAD: Data security, data wiping, data shredding, certificates, environmental disposal and remarketing
